

EO22 EMBRACE OUTDOOR DINING TABLE

EOOS

DESCRIPTION

The Embrace Outdoor Series features highly finished wooden frames of solid, FSC®-certified, untreated teak – a highly durable wood type suitable for outdoor use. The dining table has a light look as if it is floating. Inspired by the poetic dance of kites crossing in the sky, the playful wire construction of the frame draws parallels to the kite's tether, with the crossed wooden base functioning as the anchor. The round tabletop comprises 50 pieces of solid teak assembled in a classic daisy pattern to the highest degree of precision.

DESIGNER

EOOS is an Austrian collaborative design trio established in Vienna in 1995 by Martin Bergmann (b. 1963), Gernot Bohmann (b. 1968), and Harald Gründl (b. 1967). The trio was founded after they graduated from the Venetian University of Applied Arts. Today, the internationally renowned collaborative approaches complex furniture, product, and shop design by examining past roots in a contemporary context. EOOS views design as a poetic discipline, believing that end results should be able to accommodate changing needs and desires. Their unique design process focuses on myths, rituals and intuitive expressions, creating connections that extend beyond initial perceptions.
