

GL101 TIMBUR OUTDOOR BENCH

GUDMUNDUR LUDVIK

BY APPOINTMENT TO
THE ROYAL DANISH COURT
CARL HANSEN & SØN

DESCRIPTION

The Timbur Outdoor Bench is made of certified teak, which is a strong and durable wood that withstands a variable outdoor climate while patinating beautifully over time. The bench has a number of understated details, such as the subtly curved backrest, which is not apparent at first glance, but enhances the comfort, and the carefully hand-sanded rounded edges of the armrests. In addition, the generously shaped armrests can function as side tables with space for both a cup of tea and a small plate. A seat cushion in water-resistant textile is available for even greater comfort.

DESIGNER

Gudmundur Ludvik's background as a cabinetmaker is reflected in the design of the bench, where the natural structure of the wood is an inherent part of the overall look. He has challenged the balance between simplicity and exclusivity by keeping all the details to a bare minimum. What remains is a harmonious design emanating calm and strength.
