DESCRIPTION

Serpentine in shape, beautifully balanced and gleaming like a jewel, the Aspide Lamp by Gianfranco Frattini is both a brilliantly practical piece of industrial design and an irresistibly playful design statement. First developed in 1970, the Aspide is a highly adjustable table lamp that looks like no other light before or since, but which still expresses the material and aesthetic tastes of its time. The Aspide was designed as a versatile task lamp that can be manually adjusted to create either direct light for work or reading, or turned toward the wall to create a softer, ambient glow; in fact the body of the lamp can be manually rotated 350° in both the neck and the head.
