FOSCARINI

Rituals is a combination of east and west, memory and modernity, poetic inspiration and technological research. It is a family of distinct, complementary shapes that translate the luminous magic of oriental rice paper lanterns into the precious physical form of blown glass. The special glass working method, with irregular lines that mark the surface, was created by the industrialisation of the artisan process of grinding. The result is a delicate, fascinating decoration that produces a unique sensation of chiaroscuro and a soft and gentle light. The

strength of this design concept has allowed us to develop new sizes and uses, which are not merely adaptations, but real explorations of the further possibilities of this project. The ceiling version, available in three different forms and sizes presents the diffuser in its entirety, thanks to a discrete frame, a pure and simple circular shape that leaves the whole focus on the glass.

## Description

Collection of ceiling lamps with diffused light. Three diffuser shapes of hand-blown glass made using a glass-blowing procedure without turning the glass in the mould (referred to as "stationary"). The striped effect is achieved using a mould with negative decorations which are repeated across the surface of the glass, which is subsequently ground manually "by belt" and which then undergoes immersion in acid in order to emphasize the plaster-like effect. Ceiling fitting in epoxy powder coated metal

**Materials** blown satin glass and lacquered metal

**Colors** white

**Brightness** light
