

Wall Clocks

George Nelson, 1948-1960

Belief in progress and growing economic prosperity were central aspects of the American way of life around 1950. Everything seemed possible, and people strove to be ‚modern‘. With the aim of bringing modern design into American homes, George Nelson conceived a wide array of everyday objects: lamps, clocks and other domestic accessories. Up until the 1970s, the Nelson office created many different items for the home, including the ‚Bubble Lamps‘ and the ‚Ball Clock‘, which became icons of mid-century modern design.

The Wall Clocks are available in a diverse range of shapes and materials. Equipped with high-quality quartz movements, they offer a refreshing alternative to conventional clocks.

- **Materials:** various types of wood and metal.
- **Product contents:** high-quality quartz clock movement, 1.5 volt battery included.

Dimensions

Asterisk Clock,
black, Ø 250

Ball Clock,
orange, Ø 330

Ball Clock,
beech, Ø 330

Ball Clock,
multicoloured, Ø 330

Ball Clock,
red, Ø 330

Ball Clock,
