DESIGN BY PIERRE CHARPIN

Pierre Charpin's PC Task Lights series is a collection of refined and precisely engineered task lamps designed to provide focused light where needed. The lamps are constructed in aluminium, with a subtle sheen finish. The functional design conceals gas springs that enable the arms and head to hold their position wherever they are moved, and it features an integrated-touch dimmer switch with a memory function that controls brightness levels and automatically turns off after five hours. The PC Task Lights are available in a variety of size and colour options and are suitable for both contract and domestic markets.
